**GPLv3**

**built with wx Widgets**
Cross-Platform GUI Library

**W3C css**

**GetFirefox**

BerliOS Logo

Please select a setup package depending on your platform:

- **Windows 2000/XP/Vista/7//8**
- **Linux 32-bit**
- **Linux 64-bit**
- **Mac OS X**

**NOTE:** There are also more recent *nightly builds* available in the **forums** or (for Debian and Fedora users) in **Jens' Debian repository** and **Jens' Fedora repository**. Please note that we consider nightly builds to be *stable*, usually.

**MIRRORS:** BerliOS mirrors all files *usually* at SourceForge using a "BerliOS robot" **here**. As this sometimes doesn't work, we have mirrored all file releases at SourceForge, too **here**. The latter is managed by us.

**IMPORTANT NOTE:** If you try to download from BerliOS and get a "Too many clients!" - error, you should retry to download the file. According to a BerliOS - admin, this can happen several times, before the download starts. Alternatively use on of the mirrors.

**NOTE:** We have a **Changelog for 13.12**, that gives you an overview over the enhancements and fixes we have put in the new release.

---

### Windows 2000 / XP / Vista / 7:

| File | Date | Download from |
|------|------|---------------|
| codeblocks-13.12-setup.exe | 27 Dec 2013 | **BerliOS** or **Sourceforge.net** |
| codeblocks-13.12mingw-setup.exe | 27 Dec 2013 | **BerliOS** or **Sourceforge.net** |
| codeblocks-13.12mingw-setup-TDM-GCC-481.exe | 27 Dec 2013 | **BerliOS** or **Sourceforge.net** |

**NOTE:** The codeblocks-13.12mingw-setup.exe file *includes* the GCC compiler and GDB debugger from **TDM-GCC** (version 4.7.1, 32 bit). The codeblocks-13.12mingw-setup-TDM-GCC-481.exe file includes the TDM-GCC compiler, version 4.8.1, 32 bit. While v4.7.1 is rock-solid (we use it to compile C::B), v4.8.1 is provided for convenience, there are some known bugs with this version related to the compilation of Code::Blocks itself.

IF UNSURE, USE "codeblocks-13.12mingw-setup.exe"!
